OBJECTIVE

An Enthusiastic B.Tech Computer Science (AI & ML) student seeking an entry-level Software Developer role to apply my knowledge, collaborate with teams, and continuously enhance my technical expertise.

EDUCATION

B.Tech in CSE (Artificial Intelligence and Machine Learning) 2024 – present

Sumathi Reddy Institute of Technology for Women | CGPA: 7.1

Intermediate 2022 - 2024

SRM Junior College | CGPA: 7.5

SSC (Class X) 2022

Navodaya High School | CGPA: 9.5

TECHNICAL SKILLS

Programming: Java, Python, C

Web: HTML, CSS, JavaScript

Database: MySQL

Tools: Git, GitHub, VS Code

PROJECTS

AI Resume Analyzer / *Mini Project*

- Developed an intelligent web utility designed to parse resume files, break down content text chunks, and map key user skill patterns.
- Matched candidate skills with job descriptions using keyword-based analysis.

Team Task Allocation and Process Tracking System / *RTRP Project*

- Designed an end-to-end task workflow module focused on dynamic task assignments and transparent progress timelines for software teams.
- Implemented task status updates (Pending, In Progress, Completed).

GYM Management System / *DBMS Project*

- Developed a centralized database system to automate gym operations, replacing manual paperwork with digitized member tracking and billing.
- Created ER diagrams and SQL database with normalized tables.

Rule-Based AI Chatbot (Python) / *Internship projects*

- Developed a desktop chatbot with an interactive GUI and predefined intelligent responses.

Tic-Tac-Toe Web Application (HTML, CSS, JavaScript)

- Created a responsive web game with winner detection, draw logic, and restart functionality.

Responsive Landing Page (HTML)

- Developed a fully responsive landing page ensuring seamless performance across desktop, tablet, and mobile devices.

Stop Watch Web Application (HTML, CSS, JavaScript)

- Built an interactive stopwatch application featuring accurate time tracking, lap recording, and a responsive user interface

INTERNSHIPS & JOB SIMULATIONS

AI Intern | DecodeLabs (June 2026)

Developed responsive web applications using HTML, CSS, and JavaScript.

Web Development Intern | Prodigy InfoTech (June 2026 – Present)

Applied basic AI concepts and Python programming to create a desktop chatbot application.

GenAI Powered Data Analytics Job Simulation | Tata Group (Forage)

- Completed real-world data analytics tasks using Generative AI concepts to derive business insights.

Data Analytics Job Simulation | Deloitte Australia (Forage)

- Analyzed datasets, identified insights, and created data visualizations to support decision-making.

CERTIFICATIONS

- AWS Cloud Practitioner Essentials on **Amazon Web Services** – June 2026
- **Cisco** CCNA: Introduction to Networks, Data Analytics Essentials, Introduction to Modern AI
- Abhigyaan 3.0 with the theme of “**ETHICAL HACKING**”

ACHIEVEMENTS

- Introduction to Cloud Infrastructure Trophy at **MicrosoftLearn**
- Successfully completed multiple AI and Web Development projects.
- Published projects on GitHub.
